What's New in the Adobe Acrobat Reader?

There are lots of free applications, but here's a hand-picked list of the best. They are sorted by price and feature quality. - -Create and save PDF files on your PC for use on any platform and to send through email. -PDF files are basically just documents in a file format that is a cross between a document and an image, so you can view them on any device. -When you open a PDF file, you can read it on your PC, tablet or smartphone, but you can also save it and work on it offline if you want. -PDF files are a versatile format, and can store text, graphics, charts, equations, equations and much more. - -You can save PDF files to the cloud with the option of making them public or private and downloadable from any device. -PDF files are the most popular file type around the world, and most mobile devices and cloud storage services support PDF files, so there's no reason you shouldn't use them. It's a good app but it's had some issues. I've never had an issue until recently. Every time I open an application, the app switcher freezes for a second before opening the application. If I scroll through my open apps, all apps will open fine. But once it's open, scrolling back to the previous application will freeze for a second, and then the app switcher will freeze. I've read other people having similar issues. If I close the app, the problem goes away. Anyone know if this is a known issue, and what could be causing this? The app switcher freezing isn't the only issue I've had with this app. I used to open an app from the app switcher, then tap a link in the app that opens the link in a new tab. This used to work fine, until this last update. Now I can't get the app to open the link. I just get a crash. So now I have to tap the link in the app switcher, then open the link in a new tab from there. This really sucks. I also have issues with the keyboard. For some reason, I can't use the backspace key, or the arrow keys, or the tab key. But the forward and enter keys work fine. Other than that, this is a really good app. The price is low enough that it's a great deal, and it really has a ton of features, and it's constantly improving. Just tried the app on iPad, and I'm having similar issues as above. I can't open an app or view apps from the app switcher without it freezing for a second. If I open an app, then open a link in a new tab, it will crash if I tap that link. A lot of apps crash, and it's not always the same app. I can't seem to open any app from the app
