allows you to easily edit batches of images in order to make them resemble web buttons. The application is optimized to work with large numbers of source photos and convert them in a short time. Convert Images To Buttons Software allows you to easily edit batches of images by adding bevel and embossing effects, in order to make them resemble Web buttons. The application is optimized to work with large numbers of source

photos and convert them in a short time. Quick embossing effects Convert Images To Buttons Software allows you to add a series of lightning effects to your image in order to make it look as if it were a 3D button. You may thus quickly generate buttons to use in website construction, from local pictures. The application allows you to control several settings, such as light angle, light elevation and bevel size. You can enter the

preferred values in the designated boxes, however, the software does not offer a preview so you need to be sure of the effects those values determine. The light angle and elevation are measured in degrees, while the bevel - in points. Simple to use application
All you need to do is import the images, set the effects and start the conversion. You can easily import the pictures into the program, by dragging and dropping them into the main area.

Otherwise you may load them from one or several folders, by using the dedicated button in the interface. You can even import the entire directory, and let the software filter the supported files. Once you have set the output location, you can start the conversion and watch the process evolution on the progression bar. If you change your mind or wish to adjust the parameters, you need to wait until the process is finished, since you cannot

interrupt or stop it. Batch picture editor The main feature of Convert Images To Buttons Software is its capability of managing a large number of pictures at the same time. This attribute makes it a time saver, since it can also process the images in a short time. The light parameters you set are to be applied to the entire batch. their new version of

It's not that often that a new product is created that drives me to shout about it and share it with you. For this I am very thankful, especially to explain why you should pay attention to the quality of the tools you are investing in.

The first highlight is that Photo Marta is made for photographers. The fact is that this program is born with a support of over 1000 professional photographers as well as from other life styles. It has the basis of being able to edit photographs in a simple and unobtrusive way. After having tried this software for myself, I can say that everything is easy to understand and use with a fast workflow. If you do not take care to add specifications, you can

become lost in the endless options of every functionality. I can also say that I have been introduced to new image editing technology that is not complicated at all.

Photo Marta makes it very easy to use and that is important in our daily routine. I can list the many advantages that you will experience when you start using this software: This is an excellent, very user-friendly editing solution for your images with a very intuitive interface and a fast

workflow. In every step you only find the necessary tool to achieve your goal. I 09e8f5149f
