event.response does  
not return response in  
callback I have a form  
which allows the user

---

to enter a ZIP code  
and it then triggers an  
Ajax call to a local  
service to verify that  
the number is valid. I  
want to use the  
response from the  
AJAX request to be

---

available in the  
response handler of  
my custom event  
which I have set up to  
handle the response.  
However, the callback  
function is not getting  
the response object

---

```
with it. function
onSubmit(event) { var
form = event.target; if
(form.type!='submit')
return; form.addEventL
istener('submit',
function () { var url = "";
var data = { location:
```

---

```
form.zipCode.value };  
    var xhr = new  
        XMLHttpRequest();  
xhr.open("POST", url);  
xhr.onreadystatechange  
    e = function () { if  
(xhr.readyState == 4) {  
// this function *should*
```

# return the object, but no data 3da54e8ca3
