EZ Beans Simple Business Cards makes it all that simple. I come to this article through a good friend of mine, who is a designer and has also been sick for quite some time. The little he could do has to do with 'Getting Well'... I found this article interesting, funny and inspiring. As time passes, I grow more fond of my ideas and projects. Right now I am not so much inspired to do as I am not inspired to NOT do. I've heard this question a few times and it's not so much the meaning of it, but more the delivery of it. I believe it is better to ask a question than to make an assumption that you know what the question is really about. I understand this idea of questioning yourself and it is something I will definitely practice. 1. I see it everywhere. It's in your life, everywhere you look. It's in every photo, every conversation, every work, every thought. It's all around us. 2. It's that essential part of life. Whether it's why you're here, where you come from, or the way you look, you were born into this thing we call LIFE. 3. It's part of the reason we all breathe, cry, laugh, and love. It's the start and the finish. It's the beginning and the end. It's the source and the drain. 4. It's what makes life the way it is. It's the essential essence of all

of us, and it's what you are — the way you live. 5. It's our breath. It's our heartbeat. It's why we all wake up and say, "I'm alive!" 6. It's the only thing that can't be bought. It's free. It's the one thing we all have in common. It'

EZ Beans Simple Business Cards is a desktop software application that has preformatted business card layouts so all you do is enter data and print cards. It is a simple and easy to use product. Category: Business License: Freeware Homepage: Size: 1166 KB Uploaded: 10/03/2002 MD5: c4298f693093e6a6b5f52e8c08f3ea8eQ: Access-Control-Allow-Origin is blocked for my localhost server So I'm having a strange issue with my front-end. I have a web-service written in java running on port 8181 and using Jersey as a backend. This web-service is working fine, and when I try to hit it from my index.html using this function: `window.location = ""`; I get the following error: XMLHttpRequest cannot load Origin is not allowed by Access-Control-Allow-Origin. So I go to my.htaccess

file and add this line: Header set Access-Control-Allow-Origin "*" But then when I try to hit the same url on my browser it will give me the error: Response to preflight request doesn't pass access control check: No 'Access-Control-Allow-Origin' header is present on the requested resource. So I'm lost on this one. Is there a way I can use localhost:8181 as my url in the first place? Here's the head of the html file:
