HmmXP Theme Pack [Mac/Win]

"A set of seven skins for the Trillian messenger, which adopts seven visually stunning themes, combining various blues, greens, and reds. Three of these skins (Whistler, Blue Inka, and Black) were the first skins made by the founders of the project." "A very functional and intuitive interface, with classic colors and shapes. Blue and green themes are particularly interesting because they've been in use by the same developers of the messenger for a long time. All skin's colors have been renewed, but the visual aspect remains the same." "In the interface you'll find a total of 14 widgets, which can be configured to fit the aspect of your desktop. Basic functionality is included, such as addresses, status, notifications, bookmark, presence, files, chat, and photo view." Download : Note: For those who have more than one Trillian account, the archive contains an easy installer to switch between the skins in all of them. It can be downloaded and run from the Preferences -> Skins section. Howdy guys! Here's a brand new wallpaper from the guys at the MvCCGaming group. The pretty blue lady here has on a great green dress, which not only has a lovely train attached, but also a great belt. Oh, and she has on those thigh high stockings. That's a very sexy look in my book, and the sexy lady is standing next to a clear blue lake. Love it! This is another custom screenshot, made by Bartek himself. It's based on the Trillian interface (dark theme, if you'd like to know the real color). It's about the "Mudpuppies - Life of Pi" release party on 04/04/09. The Mudpuppies is a highly-regarded indie game which was released to stores on 04/01/09. The occasion was extremely exciting, as it was announced that the game was launched in the US. What's New in the HmmXP Theme Pack?

The idea for this skin pack was born in 2005. Then, the same developer team created some interesting skins for Windows Live Messenger, Live Messenger, Windows Live Spaces, Windows Live Writer, Live Mail, Windows Live Mail, Windows Live Hotmail. They were all great in their own way, and this has allowed us to take a step back and improve the interface of Trillian. Besides, we've built the HmmXP Theme Pack with compatibility in mind. Now, it works perfectly with the latest Trillian editions, whether you have a free or pro account. Also, all these skins can be used in the latest incarnations of the suite, from Trillian 10.0, Trillian 1.4.19, Trillian 3.0 and Trillian 4.0, with no problems whatsoever. If you have, for instance, a free Trillian account, you'll be able to save your money for a pro version. Moreover, we've included two separate skins for the newest Trillian editions. The first is called Whistler, which is based on the theme of the same name, and uses the monochrome color palette. The second, like a classic skin, uses the green, red, blue and the white color scheme. Obviously, this pack does not work with a standard Trillian installation. HmmXP Theme Pack Screenshot: HmmXP Theme Pack Final Verdict: There are plenty of skins for Trillian already, so why should you bother using the HmmXP theme pack? For starters, it's a nice, affordable way to look at your IM without any problems. Although you'll need to apply the configurator tool to be able to change its look, it's still the easiest and most appropriate way to customize the interface of the instant messenger. Second, this theme pack is much more than a mere skin pack. It also features a total conversion of the default design and style of the program. We bet you'll enjoy it for sure. It may take some time to apply, but if you've seen one of the skins, you'll find it very appealing.
