## Shutdown Timer Portable Download

What's more important is that your Windows registry keys will not be changed. The interface of the program is simplistic and easy to navigate through. You can schedule multiple tasks by specifying the time and date of your power management option. So, you can turn off, restart, log off or lock the computer, put it in sleep or hibernate mode, as well as launch an application or open a webpage. In addition, you can enable "System Inactivity", configure networking settings (e.g. download and upload speed), as well as save and load profiles. Furthermore, you can enable Shutdown Timer Portable to force close applications on actions, remember the settings you select in the program and to minimize to system tray on close, change the appearance (control theme and color scheme), secure Shutdown Timer Portable with a password, and more. The program takes up a moderate-to-high amount of system resources and ran smoothly during our tests. We haven't come across any issues. Unfortunately, the demo version is severely restricted. Since we cannot test all of Shutdown Timer Portable's functions, we cannot properly evaluate it. But we suggest you give it a shot to see if it matches your preferences. Screenshot: Reviews of ShutDown Timer Portable - Works well... - Shut Down and Hibernate options Awesome app. If you are using Windows 7 you can do a bit more with this application than in Windows XP, but still does everything you would need. Works well and doesn't show much of a footprint. I like that you can save and load the profile. Very simple to use and can be run from any folder. - Great app Simple and easy to use. Two problems though: doesn't allow you to choose between shutdown, logoff, lock, hibernate and standby. Also, doesn't allow to open browser with selected webpage. - Great app Shutdown Timer for Windows 10 has been a great tool to help me with my computer use. It has saved me many times from my computer slowing down due to some programs taking up too much of my system resources, causing my laptop to freeze. I was able to lock the computer and turn off Windows, etc. and it has saved me a ton of time. - Works Great So far, Shutdown Timer has saved me a bunch of times. I haven't had it fail on me yet. The only downside is that when I don't use the

## What's New In?

----- Shutdown Timer Portable is a simple portable application that lets you schedule automatic shutdowns for your system. You can put your system to sleep, log off, lock, shut down, hibernate or shutdown your computer at an exact time. Shutdown Timer Portable automatically protects your computer and saves your data. In addition, you can secure your system with a password. You can start your PC at a different time than usual. With Shutdown Timer Portable, you can automate several tasks. You can select the time and date of your automatic shutdown. You can also restart, lock, log off, shut down, hibernate or shutdown your computer with this program. Choose between the following actions: \* Lock: you can lock the computer. \* Log off: you can log off or shutdown your computer at an exact time. \* Shutdown: you can set your computer to sleep, shut down, hibernate or shutdown. \* Hibernate: you can choose to save all your data to your computer and use the hibernate feature to save your computer to disk or hibernate. \* System Inactivity: you can choose to turn off your computer if it is not used for a certain period of time. Shutdown Timer Portable does not change your system's settings or hardware. You can enable "System Inactivity" from the program itself. You can also change the internet settings (e.g. download and upload speed), and you can save and load profiles. Furthermore, you can enable "System Inactivity", secure Shutdown Timer Portable with a password, and more. The program takes up a moderate-to-high amount of system resources and ran smoothly during our tests. The program will notify you if your computer is in sleep mode and you have an application that is in foreground, so you can react to it. You can find out more information about Shutdown Timer Portable at Homepage: Download: System Requirements: ----- Windows 98/ME/2000/XP/Vista/7/8/8.1/10 How to Run: ----- 1. Double-click the shortcut to start the program. 2. When the program is opened, click on "Options" from the main menu. 3. Select the "Shutdown Timer Portable" tab. 4. Choose the desired options from the "Startup" section.
