What's New in the UltFone iPhone Backup Unlocker?

UltFone iPhone Backup Unlocker Highly recommended for all iOS users Simple, powerful and easy to use Brute force method Brute force attack makes use of all possible iterations of characters Number of characters is key here Easy to recover or recover an iTunes backup passcode Remove all information about your personal life How UltFone iPhone Backup Unlocker works?

Here are a few things you need to know about UltFone iPhone Backup Unlocker.

- 1) The first thing you need to do is create an iTunes backup password, for the first time. Upon installation, you will be given a number of options. Choose one of them, and follow the steps outlined in the main menu.
- 2) The next step will be to choose a passcode with which you can recover your password. To start with, you will have two choices, either you can simply choose a four-digit passcode, or you can go for a more complex passcode. In case you choose the latter, let's make sure you enter the correct details. Choose a passcode length from 1-10 digits, choose a character set between 1-12, and choose a minimum number of numbers and characters. For instance, 3 numbers, 2 characters, 6 numbers and characters is a common password, for this option. You are now free to change the characteristics of your passcode at any time, the settings remain in place, and won't be changed once you have applied them.
- 3) After you have set a suitable passcode, the application will run and you will have to wait for the job to complete. Depending on how many characters you have selected, the time required to change your password will vary. This will be made more clear once the application completes its work. Once the app says "Completed" you can remove the newly assigned password.
- 4) When removing a password, you will be presented with a brand new interface, from which you can recover your lost password. As soon as you launch the app, you will see the new set of options. Simply choose the option that suits your needs. For instance, you can go for the brute force method, or simply wait for the app to enter a passcode for you. Here's what the process will look like, step by step.

Step 1: The first thing you need to do is choose a simple passcode, so that you can remove all your personal information. It's not
