RowScope

This tool provides a special way to browse large text files (up to 1 GB). - Browse your files like in a text editor - Search your files, using regular expressions or text strings - Rowscope: display the rows immediately before or after the matching line - Expand the row to display its content - Hide the rows you don't want to display - Export your result as a CSV file (including the ROWSCOPE tokens)

Rowscope is a handy, easy to use file viewer specially designed to help users with large text files. It can read files larger than 1 GB. This tool will localize the part or parts of the file that you want to read, using search strings or regular expressions. You can then expand one of the rows that where found, which means that you make Rowscope display the rows

immediately before or after that row.

Description: This tool provides a special way to browse large text files (up to 1 GB). -

Browse your files like in a text editor - Search your files, using regular expressions or text

strings - Rowscope: display the rows

immediately before or after the matching line -

Expand the row to display its content - Hide

the rows you don't want to display - Export

your result as a CSV file (including the

ROWSCOPE tokens) Rowscope is a handy,

easy to use file viewer specially designed to

help users with large text files. It can read files

larger than 1 GB. This tool will localize the

part or parts of the file that you want to read,

using search strings or regular expressions.

You can then expand one of the rows that

where found, which means that you make

Rowscope display the rows immediately

before or after that row. Description: This tool

provides a special way to browse large text files (up to 1 GB). - Browse your files like in a text editor - Search your files, using regular expressions or text strings - Rowscope: display the rows immediately before or after the matching line - Expand the row to display its content - Hide the rows you don't want to display - Export your result as a CSV file (including the ROWSCOPE tokens) Rowscope is a handy, easy to use file viewer specially designed to help users with large text files. It can read files larger than 1 GB. This tool will localize the part or parts of the file that you want to read, using search strings

What's New in the?

===== A simple and handy file viewer, this program reads a text file and makes it scrollable and expandable. Features:

===== 1.Runs on Windows, Mac and Linux. 2.Display files larger than 1GB. 3.Columns can be expanded, showing the rows immediately before or after the row they belong to. 4.Advanced file search can be performed with strings, regular expressions, wildcards and other patterns. 5.Supports files with UTF-8 and UTF-16 encoded text.

Requirements: ===== 1.Rowscope is supported on Windows, Mac and Linux. 2.You should have a text editor installed on your computer. 3.You can click on a row to display the row immediately before it or immediately after. 4.You can use Ctrl+F to search for a string or regular expression in the file. 5.You should have at least 1 row visible on the screen when you start the program.

System Requirements:

iPad iPhone Android Windows Phone Web Browser This course is not part of the Creativity in Mindscapes Ed. Core Studies Program.
