Best India Science TV Channel.[Effectiveness of a co-adjuvant treatment for larynx and hypopharynx cancers]. The therapy of larynx and hypopharynx cancer is still undergoing some changes. In this study, a combination of primary surgery, followed by external radiotherapy and an induction chemotherapy with Cisplatin and 5-FU was compared to external radiotherapy alone. This co-adjuvant treatment was chosen after randomized studies from 1982 on the effectiveness of a combined treatment of surgery, radiation and chemotherapy as a treatment of larynx and hypopharynx cancer. The response, recurrence rate and survival were compared to the results of the radiotherapy alone group. It was possible to show a clear improvement of the local tumour control in the combined treatment group. The recurrence rate and the survival improved by about 30%. However, especially the local recurrence and the survival improved. Este artigo é gratuito como todos os artigos no Shifter. Se consideras apoiar o nosso trabalho, contribui aqui. Este é o preço alto que pode ser pago pelo Olivenza Digital, o maior grupo de comunicação social português, em relação aos seus adicionais – vendidos para o Sócrates, da Impresa e a Cofina.
