AutoCAD can export to Office Open XML (OOXML). The Unified Modeling Language (UML) is a standard for modeling and developing software by using diagrams, called Unified Modeling Language (UML), that can be used in visual modeling tools. AutoCAD Architecture is a Windows application. It has the same functionality as AutoCAD Civil 3D, but is developed with object-oriented programming. It can also import and export DWG, DGN and DFX files. AutoCAD Architecture can be used as a modeling application, design application, or a drawing application. AutoCAD Architecture provides the ability to lay out large complex networks of buildings on the plan, a process called Site Planning. It provides the same ability to plan projects in 3D space as AutoCAD Civil 3D, but it also lets you generate 2D site plans, in-place and standalone. AutoCAD Architecture provides a set of tools for site planning, project planning, planning a manufacturing site and building an entire factory or campus from scratch. The LPS architecture module provides a unified model and 2D/3D views for the construction, assembly, inspection, and operation phases of the building, often involving large numbers of building elements.
