**This invention relates to communications systems, and more particularly to a method and apparatus for establishing a path through a plurality of telecommunication network nodes, such as data phones, facsimile machines, Internet servers, etc., for transmitting signals from a first device of the communications system to a second device of the communications system. For simplicity, the following discussion will focus on communications systems in which the two devices are two data phones. However, it should be recognized that the techniques utilized in the present invention are generally applicable to other types of communications systems. In data phone communications, the two devices are connected by a modem through a communication channel which may be a telephone line. They can communicate according to industry standards such as the International Telecommunication Union (ITU) standards, specifically the V.34 standard, the V.8 standard, and the V.16 standard. The modem renders several industry standard functions, including the Primary Rate Interface (PRI), Caller ID, global coverage, loop carrier (where the "call" is originated by a user being charged), toll quality, electrical communication, and half duplex over a half measure duplex line. These functions comprise a telephony infrastructure that**

**Wed, 02 May 2017 16:54:46 +0000DJ Heup>I choose my name DJ Heup**

I choose my name DJ Heup

For such a young deejay, I know I get pretty high for creating many tours and fights.  
I chose my name DJ Heup for such a reason

Some people have a habit of hurting others and they go astray

DJ Heup & DJ Jerome are such people

We hurt the dreams of many, one-by-one

Until the end of the day, it doesn't matter because

The creed of love is my name to live by each and everyday

I've been a pupil of the wire since the day I was born

From many many years of drums, I became a successful and well-established DJ.

I am a DJ Heup, so simply don't touch me in the head

If you are a DJ, I'm not throwing a fight to you

So don't push me like I'm somebody else

Please Stop

If you're the type who can't stop without causing trouble

Then you've got to be warned

There's no one who can take what I'm about to say seriously

It's an unpredicted miracle brought to our site

Plus I haven't missed
