Film Description When a group of misfits find themselves on an abandoned island, they encounter a few problems. First, there are a bunch of insanely mutated creatures trying to murder them on sight. Second, their only hope of leaving is riding a river of lava to the mainland. Third, there are a group of psychopathic apparitions that are actually other people's spirits still inhabiting their bodies. Fourth, there's a warped young woman with a mask over her face and an assortment of deadly weapons. Hopefully the heroes can defeat her and reunite with the other survivors before they learn that they are all haunted by evil... It's kind of ironic considering how many themes this article covers, but I'll start with something fairly universal, the ruined body. This is a fairly common setting that produces a lot of thought-provoking stories. It's easy to imagine lost souls clinging to a rotted body, still haunted by the memories of their life to the point that they're essentially mindless husks. People often come across other spirits while camping near the desert, trying to find a way off of the Earth or some sort of shelter. They call this place the Abyss, and they're right, there really is a bottomless pit of blackness. The fact that these spirits are so menacing, that they could even turn on the characters, is exactly what makes this setting so appealing. This trope is about dread, and people aren't often happy when they're being haunted, so the effect is amplified. This effect is more than just the characters gradually being confronted with the puzzle of how these spirits can exist in places on Earth, but also how they can survive with their bodies. They don't have their own personal spirit, and so their existence must be more direct than that. Even if they could cast spells, they're just like us, they need to breathe, eat, and they have messed up genetics. In a way, they are tortured embodiments, but they're also the victims of a much more sinister force. The main character fights this with the great weapon of part of the story, a power source that keeps the ghosts there. There are a couple of these that got created in the old Yugioh games as well, such as Pit Fiend and King Ghidorah. The former's a unique situation that had an interesting evolution over

time. If you recall, the Hyperdimensional Dracos release negates the existence of the domain in an attempt to hide from the Otherworlders. As the effect

Death Cab for Cutie singer plans first U.S. show Death Cab for Cutie frontman Ben Gibbard is bringing his solo storytelling show to the city he calls home this spring. "Death Cab for Cutie/Ben Gibbard: Room To Breathe" will be staged in the November Theatre at the Workman Center in Beacon. The show is billed as intimate personal stories and is set to run Tuesday at 7:30 p.m. through Sunday at 3 p.m. Tickets are available at the Workman Center box office, 1800 Washington Ave., or online at www.workmancenter.org. Prices range from $22 to $65. Gibbard has performed at the venue as a part of the Workman Center's Jazz series in the past and toured with the music group in the early '90s. His solo work also has taken him to the Netherlands, Scotland, Australia and a show last summer in Scarborough. The gig will mark his first trip to the city since he was nominated for two Grammy Awards, one for best rock performance and one for best arrangement for "I Will Disappear." A "Death Cab for Cutie" album is on its way as well, one of many expected to be released this year. Last summer, the group released its seventh album, "Kintsugi." "I Can't Stop Thinking About You" and "Like Hell" were released in 2009. More Death Cab shows are expected this fall. After playing at the Austin City Limits fest, the duo will visit the newly formed Pop Montreal
