"Welcome to XenoShyft, a horrific space horror about a mining operation in the depths of space." - XoShyft "XenoShyft is a very solid game that even shines in sections with some learning curve." - Z-man "XenoShyft has a very unique and compelling concept. I actually had to stop playing when I finished and take a few days off in order to be able to calm myself down." - IceMonster Gameplay The mission begins with a short briefing on the importance of base security. You'll learn that The Company has been ordered to perform a field survey across the Ring, determining if it is prime real estate for NorTec's mining operations. The Company has been divided into three divisions, each representing one of these divisions: • Armory, Weapons Research and Control • Med Bay, Bio-Tech, Bio-Med • Science Labs, Command Center, Barracks This division is where the player will be placed when the game begins. The player will need to team with other players as the game progresses. Each Division will choose a unique strategy to use in order to successfully complete the mission. You and your team will need to execute these strategies while at the same time, avoiding the attacks of these aliens and horrors. Each Game Round (the duration of the game) will begin with a base overview card and 4 choices to be made: • Pick 1 of the 2 choices, Orders, and Regs • Pick 1 of the 2 choices, Tech and Ammo • Pick 1 of the 2 choices, Base Attacks • Pick 1 of the 2 choices, Group Attacks Each Division has different strategies that they must use. They must also survive the game rounds and make it to the end of the game without being destroyed by these horrors. - There are two victory conditions for the game: • Win the game when all of your divisions survive the game rounds and make it to the end! • If you win a game without any divisions losing the game, you win the game! After a game round has begun, the player will be prompted to play their armor upgrade card or equipment card. These cards represent your division's current position and consist of 3 roles. For example, the Armory, Weapons Research and Control division may have 2 cards that represent the card you will play: • Lieutenant • Soldier When you play these cards, a specific card from the deck will

### **What's new:**

Death brings unsettling clarity to Max's life as she faces overwhelming grief as she grieves her lost loved ones. Her sorrow amplifies when she touches a human corpse inside a cemetery. Soon, she descends into a realm of mysterious creatures waiting to invade her unconscious mind. Between fleeing the cemetery, fighting for her life, and coping with her new reality, Max struggles for answers. With no one to turn to, she must decide what to do with the gifts she continues to receive, whether from the lifeless body she touches or from the realm she enters. Untold Tales: And Yet We Are Not Saved From the author of "A Piece of Sky" comes her newest novel, a tale of light and dark, good and evil, romance and romance, love and loss, as two star-crossed women meet in the most unlikely of places. Actual Size The book was written with good intentions, but this came with a lot of problems in the end. I basically threw this book away, because it lacks any effort at all. Convoluted characters, drama, romanticism, not one thought is given to the main character, only what each side wants with her. How this woman lacks the will to live is beyond me. Instead of researching the title a little on a subject, she goes out and starts to sell her body in the street to be put into a bordello right away because she needs money. To write about a bordello is an insult to the ones who actually work in the ones you wrote. This one was garbage. The Good It was meant to give me an insight of what it is like to be in a young woman's life now in a world not built for women and men yet without having to do too much work on it. It came with a few genuine points in there, I have to admit. So do not get me wrong, I am not in a way bashing it by any means. Just wasting my time. I think it was meant to express some theme of how women are viewed by society and by men. The Bad Every aspect about it was awful. From conception to writing it was just atrocious. She says something good in here that the main character lost her loved ones at a very young age. So, this naturally occurs to her, she acts like a little baby crying over her lost loves. It is hilarious to see how many flaws there are in this book and how many attempts
