Secrets Of Soil

An action RPG following the general plot of Song of the Myrne. You play as Tim, who's looking for his favorite (and only) artifact to help him in some obscure adventure. But this could get complicated when he finds that other people are also interested in it, so who gets it? Simple, it depends on how well you perform in the several encounters you'll face in this game. That's why it's time to prepare. Equip yourself with gear, create potions, fix your stuff, gather resources and so on. Help the villagers to get an in-game upgrade (I'm not greedy, I'm good at sharing). In the shop, you'll find more potions, scrolls and herbs to help you along the way. When you'll find yourself at the end of a dungeon, talk to the sassy girl that will accompany you to help you find a way to get out. Don't be afraid to use "curses" (poisons) or "paralyze" (purgatory), you'll need those on this quest. You can even end a certain encounter by using combat magic (hope you don't have any enemies that require a high level in that skill, this might be a bad choice). Tim's skill tree will also allow you to practice the different combat styles: Archers are known for their accuracy and effectiveness at close range; fighters are great at long-ranged combat. If you like ranged combat with two weapons, you should definitely try the crossbow. The game's over when you'll meet the final boss, there's no right or wrong way to win this battle. You just have to do what you like, what you feel fit for this particular fight. Players will need to collect weapons, armors and potions to help them along the way, gather resources (like barrels, iron and ores), craft potions, use healers and finally put some brains in the head (not before the final encounter though, it might spoil the fun). Enemies will have attacks, armor and defense values. They can be weakened with potions, but if you go above a certain threshold, they'll be dead. Don't waste your potion on enemies that have an armor value too high, you can just defeat them at will with your sword. That's pretty much all the basics of the gameplay. Enjoy the journey and try to have fun! So you'll use potions to heal your wounds, etc...As this is a demo version, there's no more than a few enemies. You'll find

The results showed that levels of *BiP1* transcript in the *GS2-HA2-R4*-expressing plants were significantly higher than in the *HVOR2-R4*-expressing plants under all the four treatments ([Figure 5B](#F5){ref-type="fig"}). ! [Transcript abundance of *BiP* and *PR1a* in pepper leaves 48 h after treatment with the simulated herbivore attack. **(A) RT-PCR analysis of *BiP1* and *PR1a* in leaves of wild-type and transgenic plants 12 and 48 h after Pb+SO treatment. **(B)** Quantitative RT-PCR analysis of *BiP1* in leaves of wild-type and transgenic plants 12 and 48 h after Pb+SO or Pb+OS treatment. Quantitative RT-PCR was measured in triplicates and normalized using *Ubiquitin*. Statistical differences were determined by Student's *t*-test. Asterisks indicate statistical significance: $^*p < 0.05$, $^{**}p < 0.01$, $^{***}p < 0.001$, and $^{****}p < 0.0001$.]**(fpls-10-01387-g005){#F5} The transcript levels of the defense marker *PR1a* were also examined in leaves of the *GS2-HA2-R4*-expressing plants and the *HVOR2-R4*-expressing plants. We could not detect the expression of PR1a 12 h after Pb+SO treatment in both *GS2-HA2-R4*-expressing and *HVOR2-R4*-expressing plants, while 48 h after Pb+SO treatment, the expression of *PR1a* were significantly induced in the *GS2-HA2-R4*-expressing plants as compared to *HVOR2-R4*-expressing plants ([Figure 5A](#F5){ref-type="fig"}). Furthermore, 48 h after Pb+SO treatment, the transcript levels of *
