download. igrosoft. Turbo Prolog-logo. Turbo Vision+ is a DOS-based, purely graphics-oriented, high-resolution, texture-mapped graphics editor and debugger for the PC and XT.[1] Developed by IG Software, Inc., Turbo Vision+ was released in 1992. The software was packaged as a DOS application and included a command line shell interface. Turbo Vision+ was released before the release of Windows 3.0 and was available with a bundle of professional development software. IG Software also released a version of Turbo Vision+ for Windows. The retail version of the software was distributed by THINK Multimedia, a division of Data General Corporation. Turbo Vision+ was an extension of a graphics editor that THINK released as THINK Graphics View was released as part of the THINK Computer Tech Package as THINK XL, and it included many other programs. Contents 1 DOS-based, purely graphics-oriented, high-resolution, texture-mapped graphics editor and debugger for the PC and XT. 2 DOS-based program for engineering measurements and pat acquisition. Turbo Vision+ is an enhanced version of the Dos software IG Heron Riser 2.2, was no longer only for DOS systems; it also supported VGA and high-resolution EGA 16-color graphics modes. IG's DOS version had some minor limitations, mainly in regard to its restriction to 640 pixels wide X 480 pixels high graphics modes. IG's DOS version had some minor limitations a full graphical program. In the DOS version of IG Heron Riser it was possible to select a lot of extra features. With the DOS version of IG Heron Riser 2.2 has a data exchange format. Turbo Vision+ was a DOS-based graphics software which was released on December 1991, containing extra features and functions. Turbo Vision+ supported the hi-resolution modes and better graphics than
