Landlord is a surrealistic action role playing game set in a world that has been struggling to recover from a series of apocalyptic events. A short video was released in 2015, which outlined the plot of Landlord and what we will be looking for in this new game. One of the most exciting features of the game is the remaking of the gameplay, which is highly influenced by the traditional Japanese role playing game. The world itself is also huge, and will fully expand with the addition of new content that will be introduced in the near future. Storyline: The game takes place during a small rural town named "Elliot.", where you are going to lead an alternate life where you own a hotel. You will develop your own personality by nurturing your own inner strength of courage and power. The game focuses on the theme of love, and more than anything, what it means to live in this world. Moreover, it includes both female and male protagonists. While on the surface, the game makes a strong effort to leave the battles to an eventual consequence, its story will continue to evolve in unexpected ways. This world is much more complex than what a person might expect from a story set in a town. There are many "inner" elements that take place behind the events we see in the story and this game will be able to discuss them. "Petition: A Memory of the Future " The planet has been engulfed by a mysterious "stone fog" that obscures everything, including the light of the sun. There are many different factions with their own ideology, and a conflict of national warfare was about to start. While one of the factions began a war of extermination against the eastern part of the world, the only people who stayed in the eastern side were farmers, separated from the world of men by a mountain range. That is where the "Petition: A Memory of the Future" started. Solitary, unwilling to open his mouth, the protagonist went back to the old world. That's when he found the "Petition: A Memory of the Future" that opened a door to another world. While the participants in the "Petition" were all brought into a new world, the protagonist was not invited to join them. The other world has a unique culture that has never been seen anywhere else. It is not the same as the world in the "Petition", and it is called "Landlord". "Landlord" is a world where people are blessed with supernatural power c9d1549cdd

room Friday, May 14, 2014 The headless and the dying find continuous struggle to harmonize within the desire and dissatisfaction of living breath. The possibility of a paradox, forming itself in the act of

refusal, exacts its jurisdiction over the living within the dying, and the living continue despite the lack of breath, within the hunger of those who are already dead. It is this cannibalistic paradox that creates the future, the outside of religion and the end of religion; the possibility of death's end, by which, rather than the necessity of dying, do we live. Some time ago, I began to notice that: things that I found important usually have to do with characters or explanations or relations with other characters. It was a natural and nearly automatic process of coding. If I can first disclose the fundamental meanings in a story, then I can explain my understanding of it and talk about meaning. Its value depends on its efficiency for my social identification. Stories are meant to be read to each other. The set of relationships you evoke is actually far more subtle than the set of social labels that I impose on them--precisely because you have changed their roles in the chronometric process of my own life. I therefore have to rename them internally so as to find a means of putting them into the standard terms of Western ideology. Your characters are connected chronologically: they are not the selves we would wish them to be, but rather the selves we had at those times within that ordered web of ideological relations which makes up the individual, the social identity. I have taken what has seemed to be the most irreducible cut across all time and space, my consciousness itself,

to produce what is for me its eternal and atemporal center, a being close enough to be tangible, but too abstract and fragmentary to be directly apprehended by the senses. There is no ontological gap between psychology and metaphysics, only an infinite gap within the functioning of each.

Wednesday, March 26, 2014 The board of directors of the Metropolitan Statistical Area changed the name of the 6th ward to the 6th district—the name given to it when it was designed in the 1950s.

Mayors came and went, but the name remained constant. The ward voted for Nixon in 1967, threw 1984 in the tank for Ronald Reagan and overwhelmingly voted for Republican Bob Dole in 1988. (It was 80-20 for the former beltway congressman from
