'Sausage Party' Season One Review: The Tease Is Just Right I've never taken a fruit. I've never washed my hair with gasoline. I'm not the son of God. That's the joke of 'Sausage Party.' In this animated comedy, everyone is a sausage, including the voice actors who are making the jokes. It's about the things that make you normal. In 'The Sausage Party' Season One, the Gross Guys (Jackie Earle Haley, Bill Hader, Seth Rogen) and the Beauties (Judy Greer, Brittany Snow, Jillian Bell) eat, play, and have consensual sex with one another. Just a bunch of ordinary people. But the sausage world they've been born into never seems to end, so they keep going in on everything. This year, an ambitious and immature director (Steve Coogan) tries to turn the 'Sausage Party' into a movie. Rating for the Teaser The spot actually isn't a spot. The footage is just a tease. It's probably a jab at the big names who put their name on a project without seeing it through to completion. I don't think it's a jab at Sony or Disney, but it probably does hit home for Sony. In fact, Sony recently made a bad reputation of not supporting its own V bff6bb2d33

o The reason why I made this god damn thing

with little to no help on the net and im sick of it. Well I'm an 18 year old highschool student from USA. I played games since i was old enough to but didn't really get what I wanted to play. It was a story of, well I don't remember exactly, I think I got to choose the play-by-play and got stuck at that a couple hundredth time, I mean that was a while and I don't want to play the same thing over and over again for the hundred millionth time. So, that's why I designed the game with the graphics, play-control mechanics, and game environment. I did the modeler and then did the entire thing, almost entirely in 3ds max. Also, the reason why I did it this way is because I'm really not a 3d artist, I just really like making games not some sort of work you know, and there you have it. This engine is mainly just for graphics of course and not for the game design and maybe I'll just make it into an engine for all other games in the future. Doesn't my game look amazing? hmmm?
