There are many types of space-time-matter-energy-time-dimension game available on the market.However,we are the first company to create a game that features all five kinds of elements.And also,we added a novel element to the old-fashioned Mahjong-like game.Furthermore,we have added a new type of game mode,including a new scoring system and a surprise element of chance,to play Mahjong or Go-Stop.Like those games,it is also entertaining and easy to play. How to Play: The game works by using tiles having numbers in a grid. There are 2 kinds of tiles,Black and White,which are laid out in a 4x4 grid. An opening tile is moved to the next position of the 4x4 grid,and the 9 tiles below the opened tile are used to indicate the number as well as the column and row position of the opened tile. The sum of the number on the column or row makes 5 10 or 20.When two tiles of the same kind and sum is touched,they merge together. When there is a White tile in front of a Black tile,there is some chance of a white tile being moved to the next tile.There are no Black tiles on the board.A merge takes place when two tiles of the same kind and sum touches each other. Let's move on to the special feature: There are two type of tiles,One is the one which have a 5,10 or 20 at the top.Another one is the tile which have a white fish. When those two tiles are merged together,the tile become normal and has a number in the middle. The special tile remain as it is and have a white fish drawn at the top.When those two tiles touch,a huge fish will appear.The more tiles merged together,the bigger the fish.You get points when you touches a fish. We will show a better example of the above feature of the game. Entering the Coronavirus,the guest who has wrong number of tiles become the candidate.One of them gets the points by touches the fish. The more number of tiles that the candidate touches,the higher the chance of winning. Let's move on to the surprise element of chance: The tiles below the tile that you have to move to the next tile,indicates the chance of that tile to be a number tile or a special tile. For example,when you move the tile

The Long Island Land Conservancy, the U.S. Fish and Wildlife Service, Blakeslee Retterer and Tanya Retterer are the four organizations that will determine how the money will be used. The money raised will go toward the purchase of conservation land in Peconic. Once the four organizations are chosen, they will look to local companies for sponsorship and marketing efforts. These efforts are expected to last from June to September, during which time the groups will host a Peconic Land Trust website. Companies interested in sponsoring the fundraiser can request contact with Tanya Retterer by emailing them at communityrelations@longislandaudubon.org. "We're looking for companies and/or community members interested in supporting a Peconic Land Trust fundraiser," Tanya Retterer said. "We're also looking to the community at large, who may want to sponsor a table or have their logo
