Did you know that you can identify yourself with the weirdest name? Visit Rif. This is the place for finding out what this little word means (the RIF - or Rif - stands for Roulette Identification Factor). The most important this to be honest about when starting in the casino in Russia though is the fact that RIF is totally useless. While the casinos in Russia do have an identification system (which is more difficult to get than in any other country), the identification system is not actually based on the RIF. Lets say you get identified (and therefore put in a special area of the casino in Russia), and you are lucky to get a better table, only to find that you have nothing better to play on in that area. So, what do you do then? Well, you go to a different section of the casino! Why? Because you might only get a better table if you can identify yourself in a special way. So what does it mean exactly? The RIF can be compared to the ID of a passenger in a plane. All the passengers in the same plane have the same ID. Now, imagine a plane crash. Now, you are just a passenger, not even the pilot, but you might be sitting in the last few seats. If you are sitting next to the exit of the plane, well, you might get out. But the exit is at the back of the plane, and you will need to crawl or jump, or walk, through hundreds of passengers to get to the exit. So if you are in the back, that can really be a problem. Or so it is in Russia. They have a system called "Korzhak" which stands for "korzhak" (ручка - "club" in Russian). This is a special ID card which you have to swipe (with a special "mouse" device) to get the card after you have identified yourself. Some Roulette strategies that are going to give you an edge. Do you know what the numbers 6 and 8 are? If you are new to poker and betting strategies then these are numbers that you need to be familiar with. They are quite often the starting point for many of the gambles that we use. If you can get a good idea of what they are and how they perform then you can 648931e174
