December 30, 2010 Dec 30, 2010 I love Real Dolls and I think if I had a kid I would definitely give them one of these. However, I know a lot of people do not like Real Dolls. Real or 3D Doll. So if you are concerned about the safety of dolls this is not the doll for you. There was a real harmful incident involving sex dolls about a year ago and I found this article that talks about the results. This is the safest possible sex doll available. If you are looking for options I would look into the Real Doll sex dolls and try to find one on sale! There is a new blonde in the Gold Line collection so I suggest you check out the Sakura site and see if there are any deals that match your needs! [Serotonin and its receptors: affinity, distribution, receptor characterization and localization]. This review discusses the available data on serotonin, its receptors and their distribution in the central and peripheral nervous system, as well as in the immune system. Despite the large amount of information gathered on the past seven years, important aspects of serotonin function still remain unsolved. The possible roles of serotonin receptors in central nervous diseases and their possible use as targets for the development of pharmacological tools have yet to be determined. The availability of selective serotonin reuptake inhibitors, new orphan of serotonin receptors, and serotonin transporter ligands, not only will be of clinical benefit for the management of chronic pain but also in the emerging field of rational-based drug design. In Chess is one of the oldest games in the history of humanity. Unlike in most games, players compete against each other, instead of against the program, for a position where the game is determined by the better position of the players. Very Real Chess is an amazing chess experience - one of the first Virtual Reality chess games developed specifically for a Steam VR experience. Compete one-on-one against the computer with one of the best AI in the world -- the Stockfish chess engine. Play on both sides as white and black. Wrong move detection tells you when a move is not possible. Overhead view allows you to see the chessboard from above like a traditional 2D chess game. OK, I have a question: When you simulate chess in VR, what do you see (monochromatic or colored)?? In Vportal, I tried to simulate chess in VR and I can see the chessboard. But I am not sure if the VR engine simulate the middlegame with the colors that are being displayed in the chessboard. At the moment, I am not waiting to get a reply. Thank you very much! 01-06-2018, 01:01 AM NoFear_Chess Re: VR Chess: The Mechanic of the Future Hello!! I'm writing my thesis about this topic. Basically, the question you ask is important for VR chess games. 01-06-2018, 02:12 AM StoneArcher Re: VR Chess: The Mechanic of the Future Hi NoFear_Chess, Your thesis sounds very interesting. Can you point out to me the most significant questions you've read and that you want to answer? I'm particularly interested in you answer to this question: "Does VR chess successfully simulate reality?" Thanks for any reply! 01-06-2018, 05:13 AM NoFear_Chess Re: VR Chess: The Mechanic of the Future Quote: Originally Posted by StoneArcher Hello!! I'm writing my thesis about this topic. What's new:

. from burning questions fans and curious scholars might have, to what internal monologue might be lurking in the muddled and confusing mid-1960s. This month marks the 450th anniversary of Shakespeare's death, or more appropriately - the decomposition of the corpse. The summer's brought us an oversized, energy-stoking animation of William Shakespeare's life, a parody of the play, "Shakespeare", in which clip of the movie, "Part Two and a Half" (AKA "A Midsummer Night's Dream"), is the love play. It merrily breaks the film on its head while the theatre proletariat goes apoplectic. In the midst of pure, contemporary alternative comedy, dedicated to providing laughs to the children, even as the children explode into elderly critique, it takes a moment to stop and wonder when this all began. Over on the net, the 122nd Furry Shakespeare Conference is underway. Unlike conventions, the furry fandom - I mean, like, individuals - can come together from all over the world. They can go from New York to Iceland, and to Furry World Congress 8 in August. This year, which is being held in Rochester and Rochester Public Library, is the 22nd annual. The Veri-kidney, in honor of the New York convention, is the production of someone somewhere that masquerades as the playwright. The Veri-kidney's production leaves the audience with a stew of questions. How was this written when it was written? And were there homages from other contemporary Shakespearean adaptations? Playwrighter, Wade Houser (@wadehouser), is delivering the keynote this year. He's delivering this keynote at the Chicago Multicultural Shakespeare Conference with a panel of linguistically-inclined Shakespearean actors from Canada and France - the Toronto-based translation-agent, Julie Russell (@julierussell). Houser and Russell are going to be looking at the Bard of Avon's legendary text, "The Tempest", and how the play's stage history can throw new light on the literature's meaning. What is the hidden confession in "The Tempest", or the director's practical work-around. What will Shakespeare and his lovers do about the renaming of the sonnets? How did we get here?
