One of the most recent developments in AutoCAD is Project CATIA, a product of CATIA and IntelliSim developed by ETA (EDS). ETA's core business in simulation and analysis is CAD/CAM/CAE simulation and analytics for domains such as architecture, automotive, composites, civil engineering, energy, manufacturing, mechanical engineering, and space. One of the products ETA has developed is Project CATIA, a suite of highly sophisticated simulation tools for developing and manufacturing high-end products. CATIA provides a single environment for complex and difficult tasks such as computer-aided design of products, high-fidelity representation of production systems, concept analysis, ergonomics, and building information modeling. Awards AutoCAD has been recognized by multiple awards over its history: Autodesk has won the Architectural Review Association (ARA) "Architectural Product of the Year" award for three consecutive years (2004–2006), and since 2011 as the CAD program of the year.
