AutoCAD is used to design architectural and engineering models, 3D models, videos, maps, and other types of drawings. It is often the primary software used to create architectural drawings. AutoCAD comes in two major versions: AutoCAD LT and AutoCAD

---

Professional. In general, AutoCAD LT is more useful for desktop or web-based use. AutoCAD Professional is more useful for building larger, more complex projects. Once launched, AutoCAD LT will run automatically. However, you can start it manually by clicking the "Enter" key. As with most commercial CAD applications, you can click the "Zoom" and "Pan" buttons to scroll the screen and move the cursor. Note: If you do not have a mouse, you can use the keyboard to move and click to highlight objects and make selections. For a simple, step-by-step guide

to creating a drawing, refer to Step 2: Create a Drawing in the Help menu. When the AutoCAD app is open, the menu bar will be visible on the top of the screen, as shown in the figure on the left. (In AutoCAD, the menu bar is visible while the application is running, not just when the app is closed.) Figure 1: The AutoCAD menu bar Some commands (gray icons) are only available when you are in the "Layers" tool (see Figure 2). Layers allow you to add objects to the drawing by creating a drawing template and assigning it to a new layer.

---

By assigning one layer to an object, you can manipulate that object with a single click. For more information, refer to the Help menu. Figure 2: The AutoCAD Layers toolbar

If you have multiple AutoCAD instances running, they may appear in the taskbar as separate AutoCAD windows, as shown in the figure on the right. Figure 3: Multiple AutoCAD instances appear in the taskbar as separate Windows

The horizontal scroll bar below the menu bar can be used to scroll through the menus. (If you use the keyboard to

---

navigate, you can use the arrows at the bottom of the screen instead of the scroll bar.) If the menu bar is too small for the menu names, you can change the font size in the Preferences menu (F3).
