Although the release of AutoCAD was accompanied by an extensive marketing campaign, it remains a niche product, with a market share of less than 1%, selling around 50,000 units a year. Autodesk acquired the rights to the product in 1992, and released the product under a new version number, AutoCAD 2000. This article first appeared in the March 2001 issue of PC World magazine. Myths vs. Facts MYTH: AutoCAD is the best-selling CAD application. FACT: Only a small percentage of all CAD users have AutoCAD. The majority of CAD users use applications with a broader feature set, with or without substantial price differences. MYTH: AutoCAD is the most sophisticated, user-friendly CAD application on the market. FACT: Many users enjoy the relatively simple interface and quick editing speed. Some sophisticated users use alternative applications. MYTH: AutoCAD is easy to learn and use. FACT: Some users have a difficult time getting started with AutoCAD. The learning curve is steep, and users often need expert help from an AutoCAD instructor to get started. MYTH: AutoCAD is a powerful application. FACT: It has a broad feature set, but it lacks certain features typically found in more expensive software applications. Read about the challenges of CAD What are the challenges for CAD users? The most common response to this question is the price of the software. AutoCAD costs between US$1,500 and US$10,000, depending on the number of users and features purchased. AutoCAD is a niche product, so the current market value is around US$150 million. The market value does not include the time that it takes to learn the application and become proficient with it. A single AutoCAD user (even a sophisticated user) can expect to spend between 100 and 200 hours learning the application and becoming proficient with it, according to Autodesk's official estimates. Thus the market value is roughly equivalent to the value of a single employee for one year's work. A typical CAD environment includes AutoCAD, associated AutoCAD Extension products and a handful of other applications. CAD vendors use CAD extension products to build a feature-rich CAD environment. It is difficult to compile a list of all the products available. One of the best resources is the Autodesk
