Improved Linked Drawing: Team up with a colleague and create a linked drawing to use as an outline. The sharing of a single drawing among users (e.g., a specification) is the first step to share a design idea or style with others, and can lead to more shared drawing and model solutions. Linked drawings enable this sharing, and the first iteration of a shared model can lead to greater collaboration and sharing of work. (video: 1:08 min.) Linked Drawing Limitations: Limited in that they cannot be shared outside the current session.
