Q: Android Studio Trunk build error when connecting library module as library I'm trying to connect a third party library module within my android studio project. I've made the library module as a library, and the library module as a module.

When attempting to build the project, the build process fails with the following error: Execution failed for task ':app:transformClassesWithInstantRunForLibrary'.
java.lang.IllegalArgumentException: Error creating class loader for TiledMapAsset.class Does anyone know what this error means and how to fix this? Here's an image of the build error:
A: I found the solution to the above build error. Seems like my library module didn't have a file called "build.gradle" in the module's directory. Adding the build.gradle file to the root module's dir fixed the issue for me Los Angeles Police Department Cops Walk On Shadows It's
